FDOT PROJECT HIGHLIGHT I-395 RECONSTRUCTION

The I-395 Reconstruction Project (FPID 251688-1-52-01) has a total construction cost of about \$600 Million. It consists of the reconstruction of 1.4 miles of I-395 from I-395/SR 836/I-95 Interchange (Midtown Interchange) to the MacArthur Causeway Bridge, and the partial widening of the eastbound MacArthur Causeway Bridge. This project involves needed improvements in the following areas:

- Increase capacity to prevent future traffic congestion
- Improve safety by alleviating existing operational and geometric deficiencies
- Eliminate left-hand entrance/exit ramps
- Improve local access to and from I-395
- Reduce evacuation time from Miami Beach
- Structures not designed to carry additional capacity

Potential Signature Bridge Designs (left to right): Wishbone, Lotus

For more information on the I-395 Reconstruction Project, you can attend the Informational Outreach Meeting on January 26 or visit www.I-395Miami.com

DID YOU KNOW?

You can receive hands-on assistance to submit a complete and accurate DBE certification application with FDOT DBE Supportive Services. Learn more at www.FDOTDBESupportServices.com

FTBA Construction Conference
Orlando, Florida

ABOUT THE PROGRAM

The DBE Specialized Development Program's goal is to increase the number of DBEs participating on FDOT contracts and the dollar percentage awarded to DBEs by providing assistance to prime contractors and facilitating the development of DBEs to obtain contracts.
